# Microsoft Zero Trust Workshop

Keep your Microsoft  
environment secure

ALWAYS LEADING

# Microsoft Zero Trust Workshop

Learn how to align your existing Microsoft Security environment to Zero Trust architecture

Microsoft security products and services span across all elements of the architecture for Zero Trust, enabling your organization to reduce risk and complexity while improving compliance and governance. Sentinel's complimentary Microsoft Zero Trust Workshop is a 90-minute, high-impact session designed to help you apply Zero Trust principles to your Microsoft Security environment.

Built on Microsoft's proven framework and real-world deployment insights, this workshop delivers a clear, actionable roadmap to strengthen your security posture—fast. It can help you determine where to start, what (and how many) steps to take towards achieving Zero Trust, and how to measure your overall progress towards your Zero Trust implementation goals.

## SENTINEL MODERATOR QUALIFICATIONS

A Microsoft security expert with experience advising hundreds of clients on secure and optimal adoption of Microsoft products and features. With decades of experience across multiple technology disciplines and maintaining multiple Microsoft and other industry certifications and accolades with a focus on security and risk management.

## WORKSHOP OVERVIEW

- **Assessment** – An expert from the Sentinel team reviews your current Microsoft security posture, including identity policies, devices, data, applications, infrastructure, and network to identify gaps and areas for improvement
- **Roadmap Development** – We work closely with your organization's security team to help create a plan of action to apply Zero Trust principles across your Microsoft security environment
- **Report** – Following the workshop, you will receive a document detailing the primary discussion points, analysis, and recommendations on how to move forward in your Zero Trust journey with your current Microsoft security solutions

## BENEFITS

- Develop a comprehensive and custom zero trust roadmap for your organization
- Evaluate the growth and effect of zero trust on your organization
- Discover cross-product integrations that can further enhance the value of your zero-trust journey
- Enable your organization to take full advantage of the Microsoft security features and solutions you own
- Enhance your organization's overall security posture
